## ABOUT DAVID WOOLLEY

### MY GREEN PLEDGES

WSCC is very well placed to adopt climate-responsible policies in the High Weald, but we are yet to see significant progress. I pledge to work hard to keep environmental issues in the forefront:

- ❖ In nearby villages there are community schemes for local generation and electrification – moving away from burning oil and gas. If elected, I will urge the council to pave the way for similar schemes in our High Weald villages.
- ❖ I will speak up to protect our natural habitats which are under constant pressure from unwanted developments that disrupt wildlife corridors and rainwater flows.
- ❖ Our established housing stock can largely benefit from improved insulation and energy efficiency measures. I will encourage WSCC to introduce schemes that raise awareness and help homeowners find useful and affordable solutions.

Recently retired from running my sound studio business, I spend my time on my smallholding and developing ideas in energy efficiency and resource management.

Having raised a family in Lindfield for over 30 years, I see the changes that are happening in our villages.

Our community has an incredible wealth of talented people. The Green Party wants to develop cooperation and inclusion in the political process so that all voices are heard.

### YOU DECIDE

The current council in West Sussex has had ample opportunities to act but, with no real opposition, their plans and timelines slip and fade away. Now is the time to elect some new voices to bring balance and scrutiny to the chamber.

If you want green policies, you have to vote for Green councillors.
